

Appendix

Appendix 1: Src does not phosphorylate FGD5. HUVEC were starved in serum free medium for 2 h followed by incubation with 5 μ M of the Src family kinase inhibitor SU6656 or DMSO as control for 1 h. Cells were stimulated with 5 μ M AKB-9785 for 30 min (as indicated), lysed and subjected to immunoprecipitation of FGD5. Precipitates and lysates were analyzed by immunoblot for the indicated antigens.
